

Quality, Design & Dependability

WALL-TO-WALL FLAME

It's Never too late to add the warmth and appeal of an Archgard Direct vent fireplace to your home. With direct vent technology, our fireplaces can be installed almost anywhere and anytime in your home. If you are building a new home or simply updating an existing room, an Archgard fireplace will add style and ambience that you will enjoy for years.

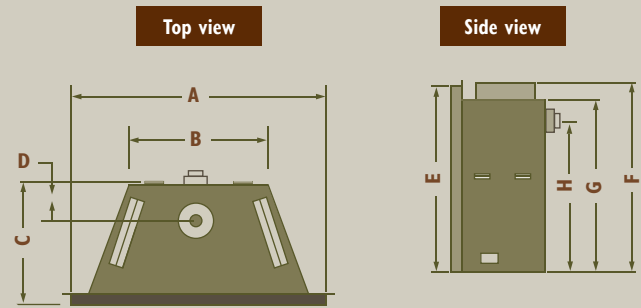

NORTH AMERICAN MADE

All Archgard fireplaces are manufactured in North America with the highest standard of workmanship. We are committed to supporting our economy and ensuring the North American market receives the quality products it expects.

WHY CHOOSE AN ARCHGARD FIREPLACE:

- ◆ Incredibly Realistic Logs and Flame
- ◆ Quality Fit and Finish
- ◆ Range of Stylish Design Options
- ◆ Wall to Wall Flame
- ◆ Limited Lifetime Warranty

HOW THEY HEAT

Archgard heater rated fireplaces provide three sources of heat to create warmth in your home: Radiant, Convection and Fan Assisted.

Radiant Heat

The natural heat generated by the fire that emanates directly through the ceramic glass. This provides the warm, comforting heat much like the sun.

Convection Heat

The natural flow of hot air through the louvers and into your home that compliments the radiant heat from your fireplace.

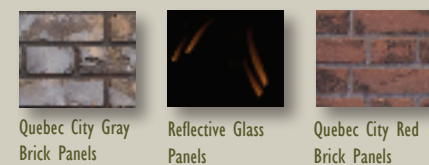

Fan Assisted Heat

For those cold nights when you need your fireplace the most, the fan will force hot air through the louvers faster than natural convection. Archgard's two largest heater rated units come with the fan pre-installed and it is optional on our smallest heater rated unit.
