WHY CHOOSE AN ARCHGARD GAS INSERT:

- ◆ Incredibly Realistic Logs and Flame
- ◆ Quality Fit and Finish
- ◆ Range of Stylish Design Options
- ◆ Wall to Wall Flame
- ◆ Limited Lifetime Warranty

HOW THEY HEAT

Archgard heater rated Gas Inserts provide three sources of heat to create warmth in your home: Radiant, Convection and Fan Assisted.

Radiant Heat

The natural heat generated by the fire that emanates directly through the ceramic glass. This provides the warm, comforting heat much like the sun.

Convection Heat

The natural flow of hot air through the louvers and into your home that compliments the radiant heat from your fireplace.

Fan Assisted Heat

For those cold nights when you need your fireplace the most, the fan will force hot air through the louvers faster than natural convection. All Archgard heater rated inserts come with a pre-installed fan at no extra cost.
